

DELTA AIR LINES

SAFETY COMMITMENT PLAN

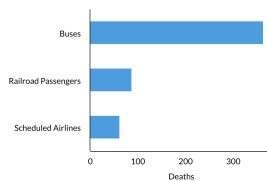

Since **1987**, Delta Air Lines has endured in being one of the most reliable airlines and our data echoes this.

Yearly, approximately **200 million passengers** place their trust in our airline above any other means of transportation to safely travel to their destination.

DID YOU KNOW?

Common Transportation Mode Deaths Comparison 2007 - 2018

12%

Scheduled Airlines, when compared to Buses and Railroad Transportation, only made up 12% of the total deaths from 2007 to 2018.

When Light-Duty Vehicles (e.g. Cars, Trucks, SUV's) are added to the equation, Scheduled Airlines only account for 0.002% of total deaths!

01

U.S. National Safety Council was not adequately able to calculate lifetime odds of dying as an aircraft passenger, given that data was **too small to calculate**.

02

Delta Air Lines, during 2014 alone, managed to invest over **10 million dollars** on customer safety.

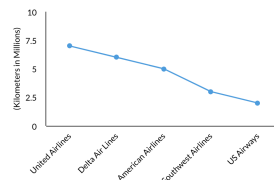

03

Delta Air Line's commitment plan incorporates proper employee safety training, along with the purchasing and preserving of the **safest aircrafts**.

DELTA EXPERIENCE

Flown Kilometers by U.S. Airlines Weekly 1985 - 2014

For over **30 years**, our commitment to our customers can be demonstrated as we have surpassed the weekly flown kilometers by U.S. airlines; with only two fatal accidents since the beginning of the 2000's!

THANK YOU FOR YOUR LOYALTY

Delta Air Lines has and will continue to be committed to the safety of our passengers over our top competitors, as reflected by aviation data gathered over **60 years**.
